Akita; has developed the system that leaves the unique inimitable components of the rose in the water with a unique technique and guarantees 100% natural and maximum quality.

It is made from fresh and organic rose flowers, the plant containing the most valuable and beneficial essential oil.

Fresh rose flowers are boiled in copper alembics, the steam containing the precious components of the rose flower are condensed to obtain rose water that has not been degreased drop by drop. We produce it as a special quality rose water using a unique distillation technique that incorporates centuries-old traditions and modern technologies.

Usually rose water is a byproduct of the distillation of rose essential oil. By preserving the precious rose essential oil, Akita has produced Akita Anti-Aging Rose Water, which contains all the vitamins, minerals, essential fatty acids of the precious Rosa Damascena flower and Proteolea extract.

PROTEOLEA® is a combination of natural ingredients that work together to produce an anti-aging effect. Made of olive leaf extract, jujube extract and levan, **PROTEOLEA®** activates the Proteasome, improves stress resistance, improves skin hydration, skin roughness, rejuvenates the eye area, and perceivably counteracts the signs of aging.

ANTI-AGING ANTI-WRINKLE FIRMING

Protective Face Tonic for All Skin Types

- Hypoallergenic and tested on sensitive skin.
- Giving flexibility to the skin
- Anti wrinkle, anti aging
- Helps rejuvenate the skin.
