

SYNERGISTIC ANTI-AGING FOCUSED PTEROSTILBENE FORMULA

PTERO GENE™ IS AN ANTIOXIDANT SYNERGY FOCUSED ON THE ANTI-AGING ASPECTS OF PTEROSTILBENE AND RESVERATROL.

Although Pterostilbene is a phenol that is chemically related to Resveratrol it differs by increased bioavailability and a well-defined activity in the body focused on regulating energy metabolism.

The added Quercetin is itself an antioxidant that further complements Resveratrol and Pterostilbene. The overall bioavailability of these antioxidants can be potentiated with the help of the added MCT and Piperine.

In general, Sirtuins help regulate your cellular health, but they can only function in the presence of NAD⁺. Sirtuin 1 is particularly important as it is a protein encoded by the SIRT1 longevity gene.

PROVITA - A STORY OF LOVE AND HEALING -

Our founder, Dr. Lucian Delcea, started Provita out of necessity. His wife was ill. And when drugs failed her, he began his search for an alternative. Before Provita launched in 2005, he sifted through countless hours of research; counseling with some of the top European naturopaths to produce more progressive support for the body's functions. Dr. Delcea came to understand the body's healing process; how it could naturally overcome disease. All it needed were triggers to properly recognize and absorb nutrients for self repair. Provita is not just a natural health line - it's an understanding of the body's own mechanisms. Dr. Delcea's now healthy wife is testament to that.
