

Unique E[®] Mixed Tocopherols

The Standard In The Industry For Mixed Tocopherols Since 1962!

UNIQUE E[®] Tocopherols — are encapsulated in Kosher beef softgels and consist of the natural form of vitamin E as obtained through the diet and as used by the body. The concentrated formula provide the synergistic benefits of the complete vitamin E tocopherol complex (d-alpha, d-beta, d-gamma and d-delta tocopherols) and delivers the highest biological activity by providing the optimum proportions of the complex in the body — and is completely void of fillers or additives that can turn rancid.

Vitamin E supplementation can provide many valuable health benefits:

Cardiovascular Health

- Supports overall cardiovascular and circulatory health*
- Promotes healthy coronary blood flow*
- Provides antioxidant support*
- Supports the body's ability to appropriately process and utilize important lipids*
- Helps maintain healthy cholesterol levels*
- Helps support healthy red blood cell flow*

Aging

- Supports healthy focus and memory retention*
- Helps to promote healthy brain function*
- Provides antioxidant support throughout the body*
- Helps maintain the integrity of cellular function*
- Supports healthy immune function*

General Health

- Promotes eye health*
- Supports and promotes the immune system*
- Supports the body's ability to regulate pro-inflammatory molecules, including C-reactive protein*
- May be applied externally as a topical to promote dermal health*

See & Taste The Difference!

Most vitamin E on the market looks light in color—that's because it may contain up to 50% vegetable oil as a filler.

UNIQUE E[®] does not! Bite into one of those oil-diluted vitamin E capsules and it will most likely taste bad—that's because vegetable oil can turn rancid—UNIQUE E[®] has a mild taste!

THE SCIENCE BEHIND THE PRODUCT

Vitamin E is a complex of eight molecules that work together synergistically. Taking a Vitamin E supplement with only d-alpha tocopherol instead of the entire mixed tocopherol family of isomers can actually deplete the level of d-gamma tocopherol in the body.

The mainstream medical community only recently recognized the importance of d-gamma tocopherol. But A. C. Grace has noted the importance of d-gamma tocopherol since 1962. Our proprietary formula of concentrated tocopherols is specifically designed to provide the highest biological activity and maximum synergistic benefits of the all-natural complex.
