

NMN (β-Nicotinamide Mononucleotide)

Promotes Healthy Aging

NPN 80119407

250
mg

30
Capsules

60
Capsules

120
Capsules

NMN is a precursor to NAD+, a vital coenzyme naturally occurs in your body. As you age, NAD+ levels decline up to 50%. NAD+ levels plays an essential role in cellular energy production and mitochondrial function. NMN has been demonstrated to support exercise performance by increasing NAD+ levels in human skeletal muscles*. Arcwell™ NMN is in a stable form with high purity over 99%.

FEATURES

- ✓ Supports cellular health and energy production
- ✓ Helps boost NAD+ levels
- ✓ Source of Vitamin B3

NAD+ DECLINES WITH AGE

By middle age, our NAD+ levels will decline up to 50% comparing to when we are young.

POTENTIAL HEALTH BENEFITS OF NAD+

BRAIN

Improved brain function and protection from neurodegeneration

INFLAMMING

Reduced inflammation and improved immune cell function

VASCULATURE

Increased neovascularization, capillary density and blood flow

LIVER

Improved liver function, reduced hepatic steatosis and increased capacity to regenerate

MUSCLE

Reduced atrophy, enhanced mitochondrial function and increased physical activity

PANCREAS

Improved β-cell function, increased insulin secretion and reduced inflammation

ADIPOSE TISSUE

Reduced dyslipidemia and prevention of insulin resistance

WE ARE HERE FOR YOUR HEALTH

We share the common dream of employing science to improve society's quality of life. Our supplement journey started from pursuing a healthy lifestyle based on a natural approach for ourselves and our loved ones.

In a quest for dietary supplements that could help support day-to-day diet, we three chemists came to realize that even though you can find supplements that are extremely beneficial and backed by science, there is also a great deal of misleading information in the market. It is clear that this misleading information results in confusion and mistrust from health enthusiasts.

trans-RESVERATROL

Supports Healthy Aging

NPN 80114426

250 mg
60 Capsules

Resveratrol is a polyphenol found naturally in red wines and berries. trans-Resveratrol as an active form has been shown to have **antioxidant, anti-inflammatory, anti-proliferative, and anti-angiogenic** effects based on scientific research. It has been proven to enhance cognitive and cerebrovascular functions and support healthy aging.

Arcwell™ trans-Resveratrol is formulated with high purity Veri-te™ Resveratrol produced via an innovative yeast fermentation process, making it free from contaminants such as emodin and PAHs, which are often found in unpurified extracts derived from Japanese Knotweed.

FEATURES

- ✓ > 98% Pure trans-Resveratrol
- ✓ Potent antioxidant
- ✓ Helps fight against cell damage caused by oxidative stress from free radicals
- ✓ Supports brain function
- ✓ Not an extract containing ONLY 50% active ingredient.

N-ACETYL-L-CYSTEINE (NAC)

Enhances the Level of Glutathione

NPN 80113725

600 mg
90 Capsules

N-Acetyl-L-Cysteine (NAC) is a stable form of the amino acid “Cysteine” which is found in the human body. By taking NAC, your liver and kidney convert it into cysteine, which in turn will be converted into Glutathione to **support your body's immune system and help against DNA damage caused by free radicals**. NAC has been demonstrated to relieve symptoms of chronic bronchitis and help clear excess mucus in the lungs in people with cystic fibrosis or chronic obstructive pulmonary disease (COPD). In addition, studies show NAC helps **attenuate the severity and frequency of influenza-like symptoms and improve immunity**.

FEATURES

- ✓ Relieves symptoms of chronic bronchitis
- ✓ Supports immune system
- ✓ A precursor to Glutathione, a potent intracellular antioxidant

GLUTATHIONE REDUCED

Potent Intracellular Antioxidant

NPN 80110388

500 mg
60 Capsules

L-Glutathione (GSH) is a tripeptide composed of three amino acids glutamate, cysteine, and glycine. It is an antioxidant present in most living organisms. GSH levels in the body maybe reduced by a number of factors, including poor nutrition, environmental toxins, stress, and aging. Glutathione helps **support immune functions and promote detoxification**. It also plays a key role in fighting against oxidative stress, neutralizing free radicals. A human clinical trial has demonstrated that glutathione helps improve insulin sensitivity.

Arcwell™ Glutathione is in a “reduced” form, an active form for optimal bioavailability.

FEATURES

- ✓ Potent intracellular antioxidant
- ✓ Helps fight against cell damages caused by oxidative stress from free radicals
- ✓ Supports immune system & Detoxifying
