

CHILDREN'S DHA™

During the first few years of life, the human brain grows at an incredible rate and is especially sensitive to nutrition, particularly the omega-3 DHA. Children's DHA is made from 100% wild Arctic cod (Skrei)—no fish body oils or synthetic additives are ever used—and is rich in both EPA and DHA, as well as healthy levels of natural vitamins A and D. This safe and effective formula supports brain and cognitive health and is third-party tested for purity and freshness.
