

NORDIC NATURALS®

Children's™ DHA

proud supporter of:
 vitamin angels

During the first few years of life, the human brain grows at an incredible rate and is especially sensitive to nutrition, particularly the omega-3 DHA. DHA is the primary building block of brain tissue, and adequate intake is essential for proper brain development, and remains necessary throughout life to maintain brain health.* Children's DHA™ is made from 100% Arctic cod livers—no fish body oils or synthetic additives are ever used—and is rich in both EPA and DHA, as well as containing healthy levels of natural vitamins A and D. This safe and effective formula supports the proper development of the brain, eyes, and nervous and immune systems, and is third-party tested for purity and freshness.* Kids everywhere love the great strawberry taste!

CHILDREN'S DHA

- Supports memory, mood, learning, and focus for children ages 3+*
- Supports the proper development of the brain, eyes, and nervous and immune systems*
- Available in strawberry-flavored liquid and chewable soft gels

As with all Nordic Naturals products, Children's DHA is in the natural triglyceride form for optimal absorption. Our patented "nitrogen processing" ensures that Children's DHA is absolutely pure and fresh. Fresh fish oils are better for the body, and do not create negative side effects such as repeat or burp-back.

Pure and fresh fish oil supplements have a high safety profile and few, if any, side effects. Physicians should be advised of individuals taking more than three grams of combined EPA+DHA daily, or if they are taking certain medications.

Every batch of Nordic Naturals fish oils is third-party tested for environmental toxins, including heavy metals, dioxins, and PCBs. All Nordic Naturals fish oils surpass the strictest international standards for purity and freshness. Certificates of Analysis available upon request.
