*Enzymedica funded, third-party study, comparing new Lipid Optimize formula vs original Lipid Optimize formula.

Uncomfortable indigestion is simply a result of incomplete food digestion. Our bodies naturally produce digestive enzymes that work to break down food into nutrients the body can absorb and utilize. The enzyme protease breaks down protein, amylase breaks down carbohydrates and the enzyme lipase digests fats. Support for the digestive system during breakfast, lunch and dinner, Lipid Optimize provides high potency enzymes specific for fat, carbohydrate and protein digestion.

Lipid Optimize has been scientifically proven to digest 3 times more fat than the original formula. A laboratory study showed 1 capsule of Lipid Optimize breaking down up to 22 grams of fat in just 30 minutes.* By aiding the digestive system, enzyme supplementation takes stress off the gallbladder, liver and pancreas making it easier to digest foods and ensuring absorption of nutrients from the foods you eat.

Enhancing digestive enzyme activity through enzyme supplementation may improve the digestive process and promote complete digestion. Complete digestion of food allows for adequate nutrient absorption and elimination of waste and toxins in the body. Optimal digestion is critical to keep you looking and feeling your best!

Fat grams digested with just one capsule!

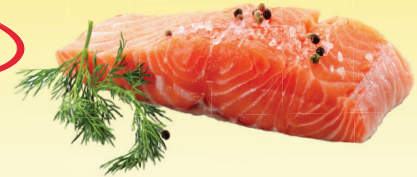

1 regular cheeseburger with **13g** condiments & veggies

with 1/2 small serving fries

5.5g

Atlantic farmed salmon (raw) 6 oz

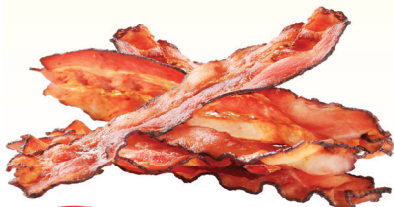

22.8g

More than 1 tablespoon oil (example: olive oil, coconut oil, etc)

13g

21g About 6 slices of bacon

22g

Avocado 1 cup cubed
