# HA Whole Body Joint & Skin Health

## KEY SELLING POINTS

- Combination of 3 ingredients. HA+MSM+Zinc
- Quick absorbing liquid
- High-molecular weight Hyaluronic Acid in a liquid supplement form

## Medicinal Ingredients

Per 1 teaspoon

<b>Hyaluronic Acid/Acide Hyaluronique</b>	<b>60 mg</b>
Sodium Hyaluronate from microbial fermentation	

<b>MSM (Dimethyl Sulfone)</b>	<b>60 mg</b>
-------------------------------	--------------

<b>Zinc (Zinc Citrate)</b>	<b>3.07 mg</b>
----------------------------	----------------

Non-medicinal ingredient(s): Water

**Recommended Dose (Adults):** Take two rounded tea-  
spoons (12ml) once daily. Take a few hours before or after  
taking other medications. Take with food. For best results,  
allow liquid to rest in mouth for 10-20 seconds before  
swallowing. Can be taken directly, or mixed with water or  
juice.

**WARNING:** Consult your physician prior to using this  
product if you are pregnant, nursing, taking medication  
or have a medical condition. Tamper resistant. Do not  
use if seal is broken. Keep out of reach of children. Store  
in cool, dry place.

## What does Hyaluronic Acid do for my joints?

HA Whole Body aids your joints in maintaining their healthy and fluid mo-  
tion. Hyaluronic Acid supplements the synovial fluid within the joint to help  
maintain its healthy cushioning properties.

## Why do I need a Hyaluronic Acid supplement?

Hyaluronic Acid is naturally produced by the body as a constituent of sy-  
novial fluid that lubricates the cartilage between the joints. As we age, the  
body produces less high-molecular weight Hyaluronic Acid.

## Where does your Hyaluronic Acid come from?

The Hyaluronic Acid in HA Whole Body, as well as the rest of the prod  
ucts from Hyalogic, comes from microbial fermentation and not an animal  
source. This high-molecular weight Hyaluronic Acid produced is equivalent  
to the Hyaluronic Acid in the body.

## When Hyaluronic Acid is taken orally, does the stomach acid break it down so the benefits are not received?

It has been noted that the majority of the Hyaluronic Acid may be absorbed  
in the mouth. However, whatever is not absorbed in the mouth passes  
through the stomach relatively undisturbed by the stomach acid and is later  
absorbed in the small intestine.
