

Worm free with Intesti Care!

One & Done Method

The one and done method is the easiest way to keep pets worm free!

Simply count number of servings as you place food into bin, add the same number of Intesti Care doses, mix, and you are done! Feeling lazy?! No worries, even if you don't count, there is no risk of over-dose. Simply ensure that the food is evenly coated with Intesti Care. Any excess will fall to the bottom.

Intesti Care absorbs into the food, adopts the same taste of the food, and becomes unnoticeable!

***Intesti Care can also be mixed into dry, wet, or raw food at time of serving.
