# NaturPet Intesti Care

All-Natural Intestinal Tract Support for Dogs & Cats

Intesti Care is a herbal nutrient-dense supplement for your pet's daily food. It helps prevent both malnutrition and intestinal parasites by targeting the parasites' early life cycles, stopping them before they have a chance to mature and reproduce.

## Active Ingredients

**Diatomaceous Earth (Food-grade)** contains microscopic particles that pierce the protective coating of parasites in the digestive tract, dehydrating and killing them. Studies show that it is also useful in targeting larvae and eggs of parasites.

**Pumpkin Seed** adds to the antiparasitic effects of the diatomaceous earth. Active compounds paralyze worms and prevent them from holding on to the intestinal walls, helping to excrete them during a bowel movement.

**Ginger** supports digestive function and helps to kill parasites in the stomach before they reach the intestines. Ginger also has antiprotozoal effects, making it useful against Giardia, Coccidia, and other protozoa.

**Slippery Elm** has a bulking and softening effect on stool which helps in cleansing the bowels. It's mucilage not only provides lots of nutrients, it also draws parasitic toxins from the digestive tract.

**Thyme** has antibacterial activity against bacteria like E. Coli and antifungal effects against Candida. It also targets and expels all life-cycles of parasites from the gut. Thyme is also carminative, improving digestion and aiding in breaking down gas and bloating.
