GenBioChem® Memory

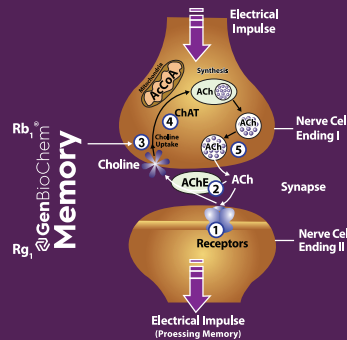

HOW IT WORKS

GenBioChem® Memory contains PBG-001, a proprietary plant extract that increases the level of acetylcholine in the brain, a neurotransmitter that allows healthy brain function.

Laboratory studies have shown that PBG-001 increases neurite outgrowth, therefore increasing the number of synapses in the brain.

GenBioChem® Memory increases the choline uptake by the nerve ending, increasing acetylcholine in the brain.

OUR ADVANTAGE

GenBioChem® Memory is developed by Dr. Jacqueline Shan and her research team using our patented GenBioChem® Triple Fingerprinting Technology™.

This technology ensures superior product quality in terms of product purity, potency and batch-to-batch consistency.

YOUR MEMORY IN ACTION

A memory is encoded through neurons “talking” to each other in the brain via synaptic connections when certain neurotransmitters are present. If strong connections between these neurons are maintained over a long period of time, the brain will be able to both store and recall this memory efficiently.

GenBioChem Memory® works by increasing the number of synapses in the brain to **promote a healthy memory.**

GENBIOCHEM® MEMORY comes in 60 capsule bottles.

Supplement Facts:

Each capsule contains:

Medicinal Ingredients:

- 100 mg of a proprietary extract PBG-001 from the root of *Panax quinquefolius* (American ginseng containing 16.5% ginsenosides)
- 60 mg of a standardized extract PBG-003 from the leaf of *Ginkgo biloba* containing 24.0% flavone glycosides and 6.0% total terpene lactones

Non-Medicinal Ingredients:

- Capsule (hypromellose, titanium dioxide), excipients (cellulose, magnesium stearate, silica, rice starch)

Recommended Use or Purpose:

- Helps to enhance cognitive function in adults
- Helps to enhance memory in adults

Recommended Dose:

- Adults: Take 1 capsule twice per day. For best results, take in the morning or during the day if feeling fatigued. Avoid taking at bedtime.
- Consult a healthcare practitioner for use beyond 6 weeks.

Cautions and Warnings:

- Consult a healthcare practitioner prior to use if you are taking digoxin or if you have diabetes, high blood pressure, or seizures, or if you suffer from hypertension or cardiovascular troubles.
- Not recommended for individuals with impaired liver or renal function.
- Use as indicated or as directed by a health care practitioner.
- Some people may experience increased blood pressure, heart palpitations, or sleep difficulties, in which case discontinue use.
- Do not use if you are taking health products that affect blood coagulation as this may cause the risk of spontaneous bleeding.
- Individuals with known allergies to ginseng or Ginkgo biloba should avoid consumption of GenBioChem® Memory.
- Do not use if you are pregnant or breastfeeding.

Target Populations for ages 12 and over:

- People with age-related memory loss
- Students looking to improve cognition
- People looking to slow the effects of neurodegeneration
